

More Than Just Bistro Buzzers

We provide a range of Comprehensive Communication solutions across your entire venue.

Guest Paging

Call your guests when their meals are ready to collect. Big savings on staff wages. Choice of pagers or SMS to mobiles. Service times can be measured and highlighted if they exceed targets.

Queue Management

Contact customers when their table or event is ready. Send messages to pagers or by SMS to mobiles. Service times can be measured and highlighted if they exceed targets

Waiter Paging

Call staff back to kitchens and bars for food and drink collection with the push of a button. Discrete pagers or watch-pagers with vibration and/or tone alert.

Staff Messaging

Send specific messages to staff via messaging pagers or watch-pagers. Send messages from any network devices including PC's, mobiles, POS, tablets.

Gaming Paging

Keep players engaged allowing them to contact service staff at the touch of a button. Stand-alone or loyalty-based systems with event logging and reporting options.

Total Venue Management

Manage your entire venue's communications with Connect Total Venue. Input LAN messaging, Loyalty systems, Alarm systems, Building Access, PBX. Output to pagers, watch-pagers, email, SMS and network connected devices. All events are time and date stamped for future analysis.

Push to Call Service Buttons

Service Please! Press to alert staff that service, drinks or payment is required. Table number or location is sent to staff member via pager or watch-pager.

Bathroom Monitoring

Let your customers rate your bathrooms for cleanliness and tidiness. An "unacceptable" rating sends a message to a pager to advise staff to attend.

Guest Table Tracking

Place your order, collect a pager and place it on the table tag to advise where the guest is sitting. A tablet at the servery displays exactly where the pager is located.

Service times are measured and highlighted if they exceed targets. Can also be used as regular guest pagers.

Two Way Radios

For Instant Communication across your venue, BTG has a complete range of two ways for retail and small cafes up to large clubs, hotels and manufacturing. Australia-wide service via GSM radios also available for multi-site operations.

Wireless Headset Communications

Hands-free communications for retail, hospitality, healthcare, supermarkets. Ideal for kitchens, call centres, healthcare applications.

Mobile Phone Charging Solutions

Keep your customers in your venue by offering re-charging options whether wall-mount, portable powerbank or flush-mount induction chargers. A wide range of options for all types of smartphones.

Brighton Technologies Group offers competitive pricing whether you wish to purchase or rent under our Managed Service Agreement program across all product ranges.
