

BTG PUCK

PAGING SYSTEM

- Improve efficiency and service level
- Reduce labour costs
- Enhance brand image
- Avoid long queues & improve customer experience
- IP67 Waterproof
 - Space saving solution
 - Small, simple and effective
 - Super bright LED visual alert

The BTG Puck Paging System optimises your service level with a strong, consistent calling signal. BTG Puck Pagers are widely used in cafes, restaurants, bistros, food courts, fast food restaurants, car dealerships, customer service centres and anywhere customers are waiting for meals or drinks or waiting in line for a table or service.

Customers have the freedom to enjoy all that your venue has to offer, while they wait. This translates into more profits for your business and makes the guest experience more enjoyable!
