- Uses (2) AAA rechargeable batteries

Applications

- Restaurant
- Cafe
- Casino
- Healthcare
- Hotel
- Stores

V3TrackStaff

➤ Cancel panel available

With a "Cancel Panel Transmitter" servers can easily cancel their pages when they pick up their order. The Cancel Panel is not necessary but is helpful if the transmitter is located somewhere that is not convenient for servers. Both transmitter and Cancel Panel have paging and cancel options available.

➤ Manager pager available

With the manager pager, supervisors will be notified if a staff member has not answered their pager.

This feature automatically alerts management and allows them to step in and lend a hand, in case any staff member is too busy to attend their page.
